

GSi is proud to announce:
Gemini – Dual DSP Sound Module.

The GSi Gemini is a sound module dedicated to the keyboard player. It provides all the most used keyboard sounds in a form no other sound modules has ever done before. More than just sample playback: there are 15 different synthesis engines including physical modeling, virtual analog subtractive synthesis, virtual tonewheel organ and more. Everything is doubled thanks to the dual DSP, just like having two identical sound modules into one shell.

Gemini is built around the latest in mobile technology. Editing the module is easily achieved by connecting to it via Wi-Fi from any computer or mobile device, such as a smartphone or a tablet.

Gemini Features:

- 2 independent DSP Processors
- 15 Synthesis Engines
- 11 effect generators
- 128 Presets
- Custom MIDI map
- Internal Wi-Fi antenna allows client connection for editor web-app
- Balanced outputs
- Output level selection
- Headphone output
- Wi-Fi password set and reset

Gemini is currently available as an expansion for the GSi DMC-122 "Dual MIDI Console". Other two versions will be released shortly: 19" 1U Rack-Mount form-factor and Table-Top form-factor.

Price of the Expansion: EUR 699,00 - USD 899,00 – CAD 1149,00

Price of the Rack-Mount version: TBA

Price of the Table-Top version: TBA
