

This is a generic template SetUp for the GSi DMC-122 that uses CC messages for all controllers that can then be "learned" directly from within virtual instruments or effects that offer the Midi Learn function.

All drawbars and pots have a range from 0 to 127, all buttons are latched, the Encoder wheel sends program change events from 0 to 127, the F1/F2 buttons shift by -1/+1 octave on both keyboards. Velocity, wheels, sustain and aftertouch are enabled on both keyboards.
